

Other Comments/Feedback from Let's Talk

- I enjoyed my time with Councilman Jim Bailey. He was very knowledgeable. Let's vote him in again.
- Concerned about speed on city streets, especially Washington.
- Good: Parks are great! Public Market is a fantastic addition. Love the downtown improvements and excited to see the bridge improvements. Thanks! Re: Cameras anywhere. We have lived in several places with cameras and we don't see a great improvement in safety. Let's use the limited money available to improve sidewalks and bike lanes to make roads safer for all. Also, bus routes – more w/less time between stops. Anything to get cars off the road!
- As I stated to the two councilmembers I talked with, I appreciate the notification via mail we get from the city concerning changes in land use/construction. Due to my input while attending these meetings, changes have been made to plans almost 100% of the time.
- I wonder why we can put bags of yard clippings out for the trash at no extra charge, but to get a yard waste can requires a monthly fee. All those trash bags are not as "green" as a reusable container would be. Perhaps a compromise would be to pay a one-time fee for the container instead of a monthly fee.
- This is not my neighborhood but we own rental property in this neighborhood. I would love to see some additional play structures in Chase Park off Delaware Street.
- Countless times I have seen parents hold their coat up and allow their children to pee outside the building. The restroom here in the park is repeatedly broken into and vandalized and is locked throughout the day when kids are in the park providing no service to those visiting. I have a number of creative ideas to make a secure, pleasing structure that would not only add to the park scape, but could be something that the neighborhood could take pride in. Anything would be better than the current shack. I would love to share my ideas further if this is something the council would consider.
- Thank you for holding these meetings.
- In the No. 2 Canyon area the number one problem in my mind is access to Western Street. I see all manners of bikes, kids, joggers, strollers, etc. going down No. 2 Canyon Road then turning the corner to get onto Western and vice versa. This is a very bad corner waiting for an accident. We need a jogging path/sidewalks coming off Western and around the corner. Another issue is parking for the tennis club. They have tournaments and really have little parking. People park all over the place on No. 2 Canyon Road. It makes it very difficult for cars and pedestrians alike. The third is Skyline. It is very popular with joggers, walkers and cyclists. It seems very unsafe. Judging from accidents like Ed Farrar's it definitely is. I think the city should undertake to solve these issues.
